Bona Commercial System® Concrete Floor Solution

Concrete Floor Renewal

If you are tired of polishing your concrete floors only to find them still looking dull and dirty the Bona Commercial System® Concrete Floor Solution is the perfect system to help you upgrade the look of your worn concrete floors without the need to burnish or polish ever again. This new system is specially designed to provide optimal coverage over concrete floors. Each item is formulated with quick drying properties that leads to minimal downtime for renewal for concrete floors as well as establishing excellent chemical resistance and high durability of the floor. Coupled with color chips that can be applied in varying weight, you can add design and durability to the floor, extending the life and reducing the maintenance needs for years to come.

Concrete Floor Base Color

Looking for a way to upgrade your concrete floors without taking on the expense and short pot-life of epoxy? The Bona Commercial System® Concrete Floor Base Color allows for single-coat coverage extending the life and reducing the maintenance needs for years to come.

Concrete Floor Clear Coat

Are you finding yourself frustrated with adding polish coats to your concrete floors only for them to need to be burnished or repolished a short time later? The Bona Commercial System® Concrete Floor Clear Coat offers long-term surface protection against heavy traffic on concrete floors.

Features & Benefits

- 1 coat Bona Commercial System® Multi-Surface Primer
- 1 coat Bona Commercial System® Concrete Floor Base Color
- 2 coats of Bona Commercial System® Concrete Floor Clear Coat
- Heavily pigmented for excellent hiding properties
- Quick drying for minimal downtime
- Two-component, waterborne formula that offers a long lasting and durable coating
- Easy to apply
- Each pack of base color comes with one 16.91 oz. bottle of hardener
- Meets ASTM D-2047 slip resistance requirements

Applications

- For use on concrete floors
- Prep the floor by using the Bona Commercial System® Microfiber Dry Dusting Pad to remove loose debris
- Strip the floor with suitable Diversey branded stripper and abrade with Bona Diamond abrasive pads once dry
- Clean the floor and apply the base color with a Bona® Microfiber Roller
- Coat the floor with Bona Commercial System® Concrete Floor Clear Coat once dry. The hardener is mixed in with the finish
- Maintain cleanliness of the floor as needed with the Bona Commercial System® Multi-Surface Floor Care Kit
